

MESSAGE

The modern era is an age of technology, in fact, a promising age of Information and Communication Technology. In this world of hi-tech communication, it is almost impossible to live a single moment without the help of ICT. In line with the galloping advancement in IT sector, Bangladesh Government is also tending to digitalize the education system. The Ministry of Education feels proud to be an active part of the Govt. Policy taking notable initiatives to reform the total education system in the secondary, higher secondary and tertiary level bringing under ICT.

“The Development of Selected Non-Government Colleges along with ICT Facilities for Improving Quality of Education Project” is one of the most vital projects aiming at creating an ideal atmosphere for e-Learning providing the selected non-government colleges with modern infrastructure, classroom decoration, necessary equipments and teaching aids. The project is significant in the sense that it will enrich the domain of knowledge among the students and teachers about modern educational systems and the necessity of ICT in teaching and learning. The project has already shown a remarkable development in the required fields by dint of dynamic professionalism and positive approach of the officers concerned.

I believe that this project will be a milestone making sustainable development in ICT based education system that will pave the way of developing e-Learning in our country. I wish the project will come out successful making the students, guardians and other stakeholders aware of the inevitability of ICT in modern education.
