

Message from Project Director

In the world of modern technology, Information and Communication Technology has added a new dimension to the existing systems in our internal and external faculties. ICT has indeed become a buzzword in every sphere of life for its charming effects on the gross development all over the world in the recent decade. Bangladesh Government has also realized the inevitability of the implementation of ICT in the basic sectors and therefore taken massive initiative to digitalize the education system through proper utilization of ICT. With a view to developing the quality of education at different levels, Ministry of Education has launched so many projects and assigned us one of such projects titled as “The Development of Selected Non-Government Colleges along with ICT Facilities for Improving Quality of Education Project”. I thank my authority for giving me an opportunity to be involved in such a noble mission.

The aim of this massive project is to implement the government policy of creating an all out environment for imparting ICT based education and thus ensure the development of the quality of education of selected 1500 non-government colleges around the country. The project covers a wide arena of responsibilities including setting up an ICT building, supplying teaching aids, classroom equipment's and furniture, imparting training on ICT to the science teachers, monitoring the venues, evaluating the progress etc. We have built the project website and update it regularly to keep the record of the project activities. I hope we will be able to complete the project successfully prior to our scheduled time.

I think there is no other alternative to the application of ICT for effective reformation in the education system and in promoting the standard of education to the international level. I wish this project would come out a grand success and become a landmark in making a historical change illuminating the total education system with the light of e-Learning.

Prof. Md. Sirajul Islam

Project Director

The Development of Selected Non-Government Colleges
along with ICT Facilities for Improving Quality of Education Project
